

Foster Lake Cable Swims

Site Map & Safety Craft Coverage Plan

Site Map:

Safety Craft Coverage: All cable swims will use 8-10 spotters and 2 rescue craft, staggered equally on each side of the cable and finish zone. We will employ accordion-style coverage (spotters and rescue craft move to fixed positions with the first wave of swimmers, hold position during the swim, and return with the final swimmers). All spotter and rescue craft will flank the cable for coverage and directional control (except as needed). The evacuation point is the shoreline on the north side of the cable.
