302.2.2 Water Conditions

A Water Temperature

(1) ...

(2) ...

(3) A swim greater than 2 miles shall not begin if the water temperature exceeds 29.45° C. (85° F.). A swim 2 miles or less shall not begin if the water temperature exceeds 31.1° C. (88° F.).

Rationale: Realizing that time of exposure in warm water is the critical safety issue for heat-related illness in swimmers, this proposal seeks flexibility in the upper temperature limits for open water swims 2 miles or shorter, staying within the FINA rule limitation of 31° C.
