

Adding a swimmer name to a relay

If you know the names of the four swimmers who swam on a relay, but the names were not entered into the Meet Manager software during the meet, you can add their names after you have uploaded the results.

In this example, none of the relay swimmers' names were entered into the meet results. (This sometimes happens at a meet if a relay is put together at the last minute and the computer operator doesn't have time to enter all of their names.)
