MAY 1982

THE IRONMAN TRIATHLON

by Jim Green

Several people have asked me for my impressions of the Ironman Triathlon that I participated in for the second time on Feb. 6, 1982, Kona, HI. The race consists of a 2.4 mile open water swim, followed by a 112 mile bike race and a 26.2 mile marathon. I have attempted to summarize my impressions as a participant as I remembered them as my facilities slowly deteriorated throughout the day.

In spite of the rotten weather during the month of January, my training had gone well. Using a racer mate in a sauna at 200° F I managed the equivalent of 200 miles per week on the bike. I also maintained 50-70 miles per week running and 15,000 meters per week swimming. Most of the heavy swimming and biking was done in the early morning hours before work. I tried to get the running in either at noon or after work. This varied, of course, if I was traveling.

Due to the incredible heat in Hawaii, I made arrangements to arrive 2 weeks before race day. The first week I rode 400 miles at a high easy rpm to acclimate to the heat. I also ran 50 and swam 2 miles per day. Very heavy seas made swimming interesting. On the big island of Hawaii 50-70 mile per hour winds are not uncommon. On one 85 mile ride we climbed to 8800 feet into 36 inches of snow. The snow on the volcanic peaks exists from about 7000 feet to 12,000 ft in the winter months. It was quite an experience to go from sea level at 100° F, to snow at 28° F, and back to sea level. That coupled with gusting 70 mph winds is not the way to taper for the Ironman. After that ride, the group I was training with decided to taper. The last week I did very little beyond loosening up in all three sports.

The field this year in the Ironman was stacked. My age group alone (35-39) had 189 competitors. Of these, 23 had run marathons of less than 2:25 and 12 had completed the Western States 100 mile run in less than 24 hours.

On race eve, I felt very fit and confident with a trace of unrestrained terror. There were 587 competitors on race day with 6 dropping out just

prior to the 7:30 A.M. start. The seas were swelling to 4 feet. Twenty minutes before the start the noise was so deafening from circling helicopters and the crowd that it had a definite adverse psychological effect.

The race started with a cannon and we were off at a pace that felt awfully fast. Beating through those 4 foot swells with 30 crazy people all around me was not a picnic. Coming back from the turnaround point, I started running into swimmers that were off course. I counted 10 collisions of that nature. Everyone of the faster swimmers had the same problem in the heavy seas. I came out of the water in 1 hour and 3 minutes in 25th place.

After a quick shower and a change into the bike clothes we started on the 112 mile bike race. The biking felt really strong and good with a spin rate of about 90 rpm. At the ten mile mark I formed up with a bunch of bike racers. It was like jumping on a freight train. The group consisted of 6 riders including myself. We went through the first 25 miles in 1 hour and 4 min. with a tail wind and moved into 6th place.

At this point, I felt very fit with a nice relaxed spin in a fairly low gear. Within 60 seconds my bike began to vibrate from side to side. Suddenly, the whole rear wheel completely collapsed, placing me onto the road in a very unpleasant manner. Over one half of my spokes had come completely out of the nipples. I found my spoke wrench and started to rebuild the wheel. Naturally every time a bike rider went by I just got madder. ABC Wide World of Sports set up a veritable studio around this whole process which lasted 40 agonizing minutes. Eric Heiden stuck a microphone in my face and noted that I had been out of the race for 38 minutes at that point and how would that effect my strategy. I gave him an appropriate one word reply.

After relacing the wheel I was only able to go 5-10 miles before having to get off and retrue the wheel. At the turn around point on the northern tip of Hawaii, we encountered 30 mph winds for the last 50 miles of the bike race. The rear wheel never would true up properly and it kept hitting the frame and the brake pads throughout the last portion of the race. Every

time I tightened the nipples down on the spokes they worked right back out. The bike vibrated like a bed in which one puts a quarter in a motel. At the end of the ride, which I did in a terrible 6 hours and 30 minutes, my legs were completely shot from fighting the head winds and the friction on the rear wheel. Crowd response was tremendous at the start of the run and enabled me to at least get through the first 7 miles out onto the lava fields. The temperature at this point had risen to 107° F during the hottest part of the day. A group of other runners and I formed up and started to push hard at about the 11 mile mark.

It was here that I saw a friend of mine, Phil Rahn, from Springfield, MO, laying on the side of the road with attendents working on him. It seems Phil went out too hard and passed out at the 11 mile mark. After they brought him around Phil convinced them he could still go on. So he promptly got up and started running in the wrong direction. He passed out the second time about the time the medical personnel got to him. I have to give him credit; it was a great DNF.

At about the 16 mile mark my body became wrapped in such a blanket of unbelievable misery that various perceptions and moral values became decidedly unbalanced. The others in our group had fallen off the pace and I was still running with Sixto Lenares from Chicago. Under his insane prodding we pushed the pace down to 7.25 minute miles with drinks on the run. At about the 20 mile mark I lost feeling in my face and hands. I tried focusing on the lights at Kona in the distance to take my mind off of the discomfort. At the 22 mile mark I decided that I was definitely not having a good weekend and that I was probably going to die. From 24 miles to the-finish line the only think I can recall were colors and crowd noise. My diaphram cramped up and I was totally unable to breath at the end. Administering oxygen helped tremendously to bring that problem under control. My heartbeat at the end was 200 beats per minute dropping to 32 bpm after about 10 minutes. My rectal (thats right rectal) temperature was 102° dropping to 96°F within 10 minutes.

My marathon time was 4 hours and 15 minutes, which was one of the ten fastest in my age group. My total time was 12 hours even. I placed 117th overall and 18th in my age group. What would have happened without the collapsed rear wheel? Who knows - but I am going back to the next Ironman in October. It was now become a question of unfinished business.

OPEN LETTER TO MASTERS SWIMMERS

Dear Fellow Aquaticians:

Regretfully I must bid farewell to all of you as a competitor. However, you may see me at some of the Regional and National meets in a different role. Those of you who were at Canton, OH last summer may already be aware of this. I hope to dutifully continue this privilege.

Some of you may already know that I suffered a heart attack in the 5th Region II Masters Championships near Baltimore on the 28 Feb. 1982. From this day forward I will support the gracious host team, Maryland Masters, my team, in a variety of non-competitive roles.

Our founder, Ransom Arthur, has told us "that we cannot absolutely guarantee that continued physical fitness through heavy exercise will protect you against all heart attacks." Until 28 Feb, this seemed to me to be an invincible shield of immunity. But now, this, 'my' umbrella of protection, has been shattered.

I believe that we owe Ransom Arthur infinite thanks. 10 years of glory, 10 national championships and One (1) national title should be enough for anyone! Verily I will miss competition, but I agree with my cardiologist that the risk to continue would be perilous. In lieu of this however, I will just swim for the fun of it.

In parting I would not recommend that you work out on your own as I had been doing since 1979. Unless you are a professional coach or M.D., you might work yourself into an overly stressful situation. Taking L.S. & W.S.I. concurrently and trying to maintain a level of 75% combat readiness may have been the deciding factor.

I further recommend that all 40+ year olds have a semi-annual check up & ease off a bit on repeat 50's & 100's. I shall see you again dear friends but 'until we meet once more, here's wishing you a happy voyage home'. Anchors Aweigh.

Mark Coughlin, Maryland Masters Swim Team

show the toll of 65 hours and 81 miles in Hall of Fame pool.

65 hours

A weary, shriveled Stella emerges with 'by far the hardest' record

By Gene Wojciechowski

Staff Writer

When it was finally over, Stella Taylor's feet and hands were shriveled like white prunes. The sun had baked her body a lobster red and the evening winds had chilled her like a bottle of champagne on ice. Sixty-five hours, 3,000 turns and 81 miles of swimming had taken its toll.

Taylor, the 52-year-old former nun and now professional swim marathoner, added another record to her list of somewhat bizarre accomplishments by breaking the existing *Guinness Book of World Record* for a continuous, non-stop swim in a fresh-water pool. Taylor's 65-hour marathon broke the old mark set by Margaret Byrne (60 hours, 15 minutes) in St. Paul, Minn. in 1978. Taylor now has a resume that includes swims of Loch Ness and Lake Okeechobee. Already, a swim from Marathon Key to the Grand Bahamas in September is being discussed.

"I knew it was going to be a long hard one," said Taylor, after being helped from the Hall of Fame pool to a lounge chair. "Just doing the actual swimming was very hard. It was by far the hardest."

Taylor was not allowed to touch the side of the pool. She was given just five minutes each hour to sip on a soft drink from a plastic container and eat a mixture of rice pudding and raisins. She never stopped treading water or touched the bottom of the pool until the swim was finished.

"I thought it would be a hell of a lot worse than it turned out," said Bob Payout, Taylor's coach for the swim. "There was no doubt in my mind she'd do it."

Taylor began the swim Tuesday night at 10. Gusting winds cooled the water and made it the most trying night in the marathon. "Nothing was as bad as the first night," said Payout. "The first nine hours we couldn't keep anything to stay in her stomach."

"I can't stand the nights," Taylor said.

The weather improved Wednesday and Taylor's disposition improved with it.

"The people here had more faith in me than I had in myself," said Taylor, who was cheered on by a crowd of about 200 people. "I thought, 'What have I done.'"

Her sponsor, a radio and television company, had distributed T-shirts that read: "I did it all the way with Stella Taylor." A radio disc jockey was on the air asking listeners to call in and wish Taylor luck. A loudspeaker at the Hall of Fame made sure Taylor heard the calls.

After the swim, Taylor accepted a plaque from Fort Lauderdale Mayor Robert Dressler, roses from Taylor's assistants, a pennant from a Swedish swim coach and a stuffed doll from a Canadian swim team. She sipped at champagne and acknowledged the toasts and attention. She said she'll be back in the pool today to loosen her tired muscles.

"I love my swimming," she said. "I would rather do my swimming than be rich and unhappy."

A GOAL - OR - ON TO THE NEXT GOAL by Stella Taylor

To train six days per week in any sport...one must have a specific "goal". My most recent goal was to swim in a fresh water pool, namely the Hall of Fame pool in Fort Lauderdale, FL, for 65 consecutive hours! Breaking the Guiness record of 60 h. 15 min.!

After the first few laps at 10:15 p.m. on April 6th, I thought "wow, what have I gotten myself into!" I was determined to finish and did just that swimming a total of 65 hours.

And now on to the next goal...Irish sea? 88 hours in a salt water pool for the record? etc.etc...I must decide my goal in order to continue training.

Masters begins with the swimming mile

■ Results, 2-C

By BOB SILVER

St. Petersburg Times Staff Writer

When Millie Hupp touched the wall at the east end of North Shore pool Friday night, a cheer rang out from the timers and spectators surrounding her lane.

It didn't matter that she was swimming at the "slow" end of the pool, or that it had taken her nearly an hour to finish, or that she had swum backstroke in an event which most swimmers use the crawl.

She tugged at the red rubber cap that covered her short gray hair and smiled up at the 10 or so people smiling down at her. She had finished all 66 laps of the 1,650-yard freestyle in the first event of the Southern Regional Short Course Masters Swimming Championships and it had taken her two minutes less than she expected. For a 66-year-old lady who has only been swimming for six years, it was good reason to smile.

"That's pretty hard on an old lady. It was the first time I've done it," she said after she had taken a couple of easy laps. "I felt like I was holding up the whole meet. I'm pleased I finished, my goodness."

She checked her time — 53:02.5 — and said, "I figured on 55 minutes — that's what I did in practice last Saturday — so I think that's pretty good."

It was good enough for first place in the 65-to-69 age group.

More than 100 swimmers showed up for the 1,650, the only event on the first day of this three-day meet. For swimmers like Millie Hupp, it took close to an hour to finish.

swimming

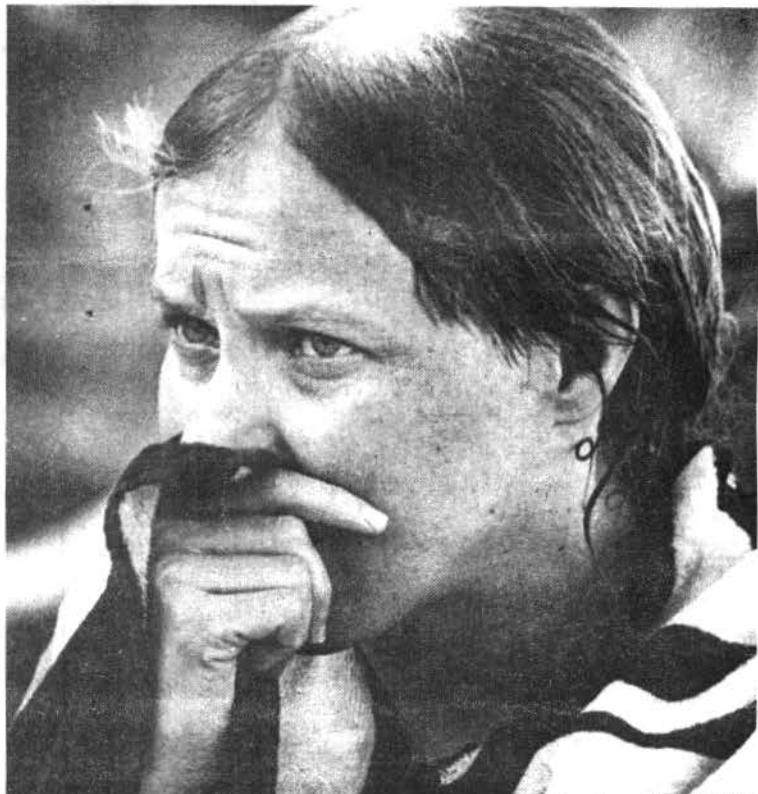

Pat Eddy, a 25-year-old swimmer from the Georgia Masters, had the fastest time of all the competitors. He won the 25-29 age group with a time of 17:39.51. Sidney Swayman, a 28-year-old representing the Illinois Masters, turned in the fastest time of the women swimmers, winning the 25-29 age group in 18:54.03.

The 1,650, or mile, is competitive swimming's endurance event, 46 laps longer than any other race. Before the race begins, when the swimmer is sitting on the starting block with 66 laps of a 25-yard pool staring him in the face, the distance can be imposing.

"I'm just thinking how good it's gonna feel when I finish," Jean Rodgers, a 32-year-old orthopedic technician at St. Anthony's Hospital, said before the start of her heat. "After I swim the first 500 yards, I loosen up. Then it's like I'm in a daze and can go on forever."

But pre-race butterflies aren't the only problem facing swimmers in the 1,650. Spending 20-plus minutes staring through chlorinated water at the bottom of the swimming pool can strain the brain. Some swimmers sing to take their minds off the drudgery. Mike Kline thinks about history.

"I thought of the laps as periods of time," said Kline, 42, after completing his first 1,650. "When I got to 40, I was entering the war years. At 50, it was the fabulous '50s, when I went to high school. When I got to 60, it was the turbulent '60s. That's when I knew I was coming down to the end."

Ohio Masters swimmer Gretchen Drake thinks about her 1,650-yard event.

Swimming News

SWIMMING HALL OF FAME MASTERS SECTION REPORT - Recorded as of 4-27-82, 39 individuals or organizations have contributed to the ISHOF building fund for the Rosser/Masters section. A total of \$3535.00 has been donated by this group. The ultimate goal of \$10,000.00 can easily be reached if each Masters Swimmer will donate \$1.00 or more. All contributors will be recorded in a leather bound book. Masters Swimmers need to be recognized by the ISHOF. Our large Ransom J. Arthur trophy is located at the Hall and the names of the recipients are recorded thereon. Please contribute so that we can have a much larger space to display pictures, articles, etc.

MASTER SWIMMERS LANE 4 - The past few issues have not been regular. However, future issues will be published by the Department of Physical Education, College of HPER at Western Illinois University. Cost is \$10.00 for 4 issues. Send to College of HPER, Department of Men's Physical Education, Western Illinois University, Macomb, IL 61455 - published by Dr. Paul Huttinger.....

HAPPY NEWS ABOUT ALL-AMERICANS - It was brought to my attention that there was a mother-son combination on the All-American list: Richard Bennett (Men 50-54) and Jerry Bennett (Women 70-74). There was also a mother-daughter-daughter combination as my mother (Sis Fogle 75-79) and my sister (Cynthia Bruce 50-54) joined me on the list!.....

TWO TO A LANE by LES FINNEGAN -

A swimmer I'd gaily attack
with thongs and flails
Is the backstroker who sports
long fingernails.

PROPER BODY POSITIONING FOR THE BACKSTROKE by Ann Yelmokas - Backstroke calls for a long, stretched body that is as flat as possible. You should be as flat as if you were lying in bed with the back of your head on the mattress. Ears

should be under the water, hips at the surface, and toes kicking to the surface. This calls for a nice tight stomach. A very common backstroke fault is collapsing the stomach muscles and "sitting down". To keep the hips up, try to stretch out the space between the lower ribs and the hip bone. You almost have to arch your lower back. Do you want to check your body position? Try this kicking drill. Push off the wall in a backglide, arms stretched and reaching over your head, lock the thumbs together, lock the elbows straight, and pull your shoulders up to your ears. (There should be no space between the arms and the ears.) This makes for a good streamlined position. Remember to stretch--reach with the arms, stretch out your ribs. Add your kick, so that kicking is providing all your propulsion. If your body position is incorrect, you will either start sinking or not move. Run through a section-by-section check to find your fault.

Are the arms locked and stretching? Is your head in line with your spine? (Look straight at the ceiling or sky.) Are you stretching the ribs up? Are you pushing the hips up? Are you kicking with the front of the foot pushing up to the surface? If the answer to all of these questions is yes, look out, John Naber!.....

UNITED STATES MASTERS SWIMMING PATCHES - For those still wanting to purchase these patches, I now have a new shipment. Make out checks to Swim-Master for \$2.50 and send to 2308 N.E. 19th Ave., Ft. Lauderdale, FL 33305.....

WHY AREN'T THERE MORE SHORT DISTANCES IN MEETS LIKE THE 25 YARDS IN ALL STROKES? - This would seem logical, except that the shorter distance and the higher speed puts a great strain on the human body. This is especially dangerous to someone over 40 years of age who is just beginning to train. Research has demonstrated abnormal heart EKGs in the laboratory on normal hearts with a short, all-out performance. The heart rate for short sprints goes to a maximum of 180 to 200 beats per minute while a swim of 200 or 500 yards keeps it more in the range of 150 to 160 beats per minute. The benefits of the Masters program, or of any fitness training, are found in aerobics (with oxygen), 200 yard swims and over, rather than anaerobic 50 and 100 yard swims. As an older adult, you are better off training and competing in the longer distances. (reprint from MASTERS SWIMMERS LANE FOUR).....

REGISTRATIONS - At the latest count, Enid Uhrich has registered 6500 of us! And can you believe how many have the same name and are in the same age group. 30 to be exact and three names alike for three people. Hopefully, these people all have different middle initials. The only way we will be able to keep our records straight. We can always go back to their registration number if we have to. Seems like very few complaints have been heard about our new registration system. Congratulations Enid on a job well done!.....
